

SMART

The Smart food vendor is the result of Necta's years of experience in the manufacture of innovative vending machines. Smart offers easy loading, simple programming and flexibility of use, guaranteeing the dispensing of a wide range of products, from pre-packed snacks to fresh food.

With a choice of FIFO or Shopper mode, Smart can hygienically dispense from 48 to 360 products, which have been correctly preserved to maintain freshness. The Smart allows an impressive number of products to be displayed to their full advantage within a limited amount of space.

Its design and compactness allow the Smart to be easily integrated into a line bank of coordinating Necta vending machines.

DISPENSING SYSTEMS

Shopper Mode: different products can be dispensed from the same disk, providing they all have the same price. A special button is used to rotate the disks until the desired product is positioned in the slider zone. The customer can select a product by entering the corresponding disk number with the alphanumeric keypad.

The slider can then be opened and the product collected.

FIFO Mode (First-in/First-out): all products are available in the same order that they are loaded into the vending machine to ensure efficient stock rotation. Therefore, all products must be the same within the disk e.g. milk cartons.

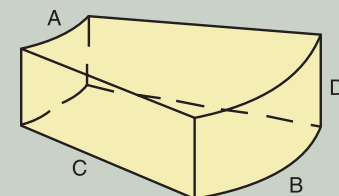

PERFORMANCE

The minimum refrigerated box and food preserving temperature which can be programmed is 3°C (external temperature: +32°C, humidity: 65%).

Should the temperature rise inside the cabinet a safety timer is triggered, which blocks the dispensing mechanism.

TECHNICAL DATA	
MODEL	SMART
NUMBER OF DISKS	8 TO 10
HEIGHT OF DISKS	50 - 90 - 130 MM
NUMBER OF COMPARTMENTS PER DISK	6, 12, 18, 24, 36
PRICES PER DISK	1
TIME PERIODS PER PRICE	2
PAYMENT SYSTEMS	EXECUTIVE, MDB
INFORMATION ON THE DISPLAY	INTERNAL TEMPERATURE AND PRODUCT PRICE
WIDTH	850 MM
DEPTH	770 MM
HEIGHT	1830 MM
POWER SUPPLY	230 V, 50 Hz
ABSORBED POWER	1200 W MAX
WEIGHT	280 Kg

NO. OF PARTITIONS	INNER ARC (A)	OUTER ARC (B)
6	70	340
12	35	170
18	23	113
24	17	85
36	11	56
DISK RADIUS (C) = 250 MM		
PARTITION HEIGHT (D) = 50, 90, 130 MM		

A device fitted with heating elements mounted on the supporting guides of the sliders eliminates condensation, thus permitting a better view of the products.

Smart's 8 bit electronics are easy for the installer to use and make it possible to program different prices for the same disk at different times of the day. It is also possible to program a timetable for the neon lighting during the day to preserve energy.

COMMUNICATION PROTOCOLS

Executive, MDB - Evadts.

PAYMENT SYSTEMS

Coin mechanism, bill acceptor and cashless systems.
